DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of "Species II (FIG. 2)", upon which "Claims 1, 2, 5, 6, 8-[1]3, 15, 16, 18, 19, and 23-27" are said to "read", in the reply filed on 26 June 2006 is acknowledged. Claims 11-13, 15, 16, 18, 19, and 23-27, however, do not read on the elected species as elected species II of FIG. 2 does not include "wherein a track width of said magnetoresistive stack layer differs non-continuously", for instance, as set forth in lines 11-12 of independent claim 11. Accordingly, claims 11-16, 18-19, and 23-27 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to one or more non-elected inventions/species, there being no allowable generic or linking claim.

Drawings

2. The drawings were received on 13 March 2006. These drawings are accepted.

Specification

3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. The following is suggested:
--MAGNETORESISTIVE SENSOR WITH RANDOM CRYSTAL ORIENTATION UNDERLAYER
AND MAGNETIC DOMAIN CONTROL FILM CENTER ALIGNED WITH FREE LAYER--.

4. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In lines 2-4 of claim 5, "wherein said amorphous metal film layer is formed on any one of surfaces within a range from a lower surface of said first underlayer to an upper surface of said first non-magnetic layer" is indefinite as it is misdescriptive of the disclosure, which teaches/shows that amorphous metal film layer **9** is formed on any one of surfaces within a range from a lower surface of second underlayer **10** to an upper surface of first non-magnetic layer **6** (emphasis added).

Allowable Subject Matter

7. Claims 1, 2, 6, and 8-10 are allowable over the prior art of record. Claim 5 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Response to Arguments

8. Applicant's argument(s) with respect to claim 5 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

9. Applicant's amendment filed 13 March 2006 necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
